

# IFR Jacket for Welding Protection

## TSG-1050 Series

IN STOCK &  
READY TO SHIP!

### Product Features:

### Made for the Professional Welder

- The TSG-1050 Series jacket is made using 8.5 oz Barrweld™ wine that is lightweight and comfortable. The fabric is tightly woven and designed to shed weld splatter and resist pin holes.
- Barrweld™ is an intimate blend of 60% Lenzing FR®, and 40% Twaron® (European version of Kevlar®) and is inherent flame resistant (IFR). That means the protective properties are inherent to the fibers, won't burn, melt, or drip, and cannot be laundered out over the life of the garment.

### Will Not Burn, Melt, or Drip.

- The Twaron® knit wrists with thumb hole provide A2 cut protection and lock the sleeves in place when donning a glove, so it does not ride up the arm and expose the vulnerable wrist.
- This jacket features two deep pockets on the inside.
- Black Snaps
- Laydown collar
- Sizes Small to 4XL are in stock (additional sizes available upon request)

Specs and laundry instructions for the Barrweld™ are available upon request.

Proudly made  
in the USA
