

Low Lint with Cut and Abrasion Protection

TSG-416 Series

ASTM F2992-15
574 grams
Cut Level A2
Based on third-party testing

EN 388
1,000 cycles
Abrasion Level 2
Based on third-party testing

Description:

The TSG-416 series is a heavy weight 10-gauge silicone-free, low lint glove made using heather green 100% polyester plaited with natural para-aramid filament.

Properties:

The TSG-416 is designed for clean rooms and departments that traditionally wear one glove for cut and abrasion protection under a second glove for low lint. By combining cut and abrasion protection with low lint properties, this glove improves employee comfort and compliance with an all-in-one design.

This series can be laundered, providing additional cost saving opportunities. The cuff is overcasted using a thermal heat set X-yarn that reduces particulate compared to the traditional sewn over-edge glove, and is color-coded by size.

The distinctive heather green color of the yarn provides visual compliance.

Size	Cuff Color
Extra Small	Gray
Small	Yellow
Medium	Green
Large	White
Extra large	Gray
