## TSG-1120-2

**ASTM F2992-15**  
**Cut Level A3**  
**1018 grams**  
Sleeve Data  
3rd Party Tested

**EN 388:2016**  
**Puncture**  
**Level 2**  
Sleeve Data  
3rd Party Tested

Proudly made  
in the USA

### Product Features:

- The front and back of the TSG-1120-2 cape are made using 7oz Barrweld™ Lite, which is an intimate blend of 60% Lenzing® FR and 40% Twaron®. This fabric is inherent flame resistant (IFR) since the protective properties are inherent to the fiber, rather than topically treated, and cannot be laundered out. With the team member's comfort in mind, the back features a high arch cutout to keep them cool year-round.
- To create a PPE "System" the horizontal snaps accommodate a snap-on bib made using your choice of fabric that best matches the threat, and available in 18", 24" and 30" lengths.

### Will Not Burn, Melt, or Drip.

- The sleeves are made using a 7 oz inherent flame resistant (IFR) heather black Twaron® Engineered woven fabric that provides cut level A3 and puncture level 2 protection and feels cool to the touch.
- The black Twaron® knit wrist with thumb hole provides cut level A2 protection and locks the sleeve in place when donning a glove, so it does not ride up the arm and expose the vulnerable wrist.
- The mic loop can also be used to attach an ID badge.

# IFR Welding Cape Sleeve with Cut and Puncture Protection

## TSG-1120-2

TSG-1120-2 is available in sizes Small to 5XL. Additional sizes and laundry instructions are available upon request.

### Create a PPE System

We recommend creating a PPE "System" by pairing the cape sleeve with a snap-on bib made using either the Twaron Engineered cut & puncture fabric or Barrweld Lite welding fabric.

Available in 18", 24" and 30" lengths.

(Twaron Engineered TSG-1112 + length)

(Barrweld Lite TSG-1037 + length)

**We also make  
gloves; it's  
right in our  
name!**

**We have 13 &  
7 gauge gloves  
from A2 to A9  
and can ship  
in 1-3 days.**

Mic Loop

To Be Sure,  
Tri-Star uses Twaron® for its superior cut, abrasion,  
and thermal resistance.

Tri-Star uses only 100% virgin Twaron®, as recycled para-aramids could compromise the performance of the glove, and yarn could be inconsistent from shipment to shipment. For more information on Twaron, visit <https://teijinaramid.com/en/products/>
