1018 grams
Sleeve Data
3rd Party Tested

EN 388:2016
Puncture
Level 2
Sleeve Data
3rd Party Tested

Proudly made
in the USA

Product Features:

- The front of the TSG-1120-3 cape is made using 7oz Barrweld™ Lite, which is an intimate blend of 60% Lenzing® FR and 40% Twaron®. This fabric is inherent flame resistant (IFR) since the protective properties are inherent to the fiber, rather than topically treated, and cannot be laundered out.
- The front of the cape also features 3M Retro-Reflective Segmented vertical striping in Yellow/Silver/Yellow.
- The back of the cape is made using IFR 5.7oz GlenGuard Hi-Vis Yellow Modacrylic / Aramid mesh that is ultra lightweight and breathable. The fabric is HRC1 ATPV 4.6, meets ANSI 107-2010 Class 2 Specifications, and is ASTM 1506 and NFPA 70E compliant.

Will Not Burn, Melt, or Drip.

- The sleeves are made using a 7 oz inherent flame resistant (IFR) heather black Twaron® Engineered woven fabric that provides cut level A3 and puncture level 2 protection and feels cool to the touch.
- The black Twaron® knit wrist with thumb hole provides cut level A2 protection and locks the sleeve in place when donning a glove, so it does not ride up the arm and expose the vulnerable wrist.
- The mic loop can also be used to attach an ID badge.

IFR Hi-Vis Welding Cape Sleeve with Cut and Puncture Protection

TSG-1120-3

TSG-1120-3 is available in sizes Small to 5XL. Additional sizes and laundry instructions are available upon request.

Create a PPE System

We recommend creating a PPE "System" by pairing the cape sleeve with a snap-on bib made using either the Twaron Engineered cut & puncture fabric or Barrweld Lite welding fabric.

Available in 18", 24" and 30" lengths.

(Twaron Engineered TSG-1112 + length)

(Barrweld Lite TSG-1037 + length)

**We also make
gloves; it's
right in our
name!**

**We have 13 &
7 gauge gloves
from A2 to A9
and can ship
in 1-3 days.**

Mic Loop

To Be Sure,
Tri-Star uses Twaron® for its superior cut, abrasion,
and thermal resistance.

Tri-Star uses only 100% virgin Twaron®, as recycled para-aramids could compromise the performance of the glove, and yarn could be inconsistent from shipment to shipment. For more information on Twaron, visit <https://teijinaramid.com/en/products/>
